

## Understand & Manage MRO Costs

# Parts Usability

Identifying and optimizing your MRO holdings can significantly reduce your organization's costs and increase efficiencies up to 40%.

Your competition continually seeks efficiencies to reduce costs & increase profitability ... are you?

The **Net Results Group** applies our extensive experience and technology to your organization's supply chain management and MRO parts departments to increase your competitiveness in the market.

Your MRO holdings determines a significant piece of your organization's profitability. The process of identifying the interrelationship between assets and the MRO supply chain is a complicated and critical process.

To ensure your organization's operating at optimal efficiency the **Net Results Group** builds MRO intelligence that can be cross-referenced with KPI's and industry trends reducing risk and financial encumbrance.

# Parts Usability

**P**arts usability is the detailed examination of all MRO inventory items and procurement practices.

Correct usability management practices ensure each asset has the correct spare part at the appropriate time.

**M**any items required for maintenance or repairs are obtained with spot buys that ignore price in favor of availability.

There is room for systematic control and more efficient methods of handling.

**A**llocate financial resources only to items that mitigate operational risk, make purchasing decisions based on fact, often minimizing overall purchase spend.

**I**dentify each inventory item with certainty and record each inventory item's consumption history and expectation.

**P**rotect the uptime of assets by ensuring practical MRO inventory.

Optimized inventory management will improve the efficiency of maintenance staff and create a pro-active, lean operation.

**A**pply NRG proprietary technology (MRO3i™) to align MRO parts requirements with the supply chain.

The cloud based MRO3i™ software suite structures your MRO data to enable better purchasing and forecasting.

**Net Results Group, LLC** assist clients in all aspects of MRO practices encompassing material provisioning, inventory management, material usability and dispositioning.

Our cloud based MRO3i™ technology suite, connects to your MRO catalogue through our portal to structure your data, enabling better inventory management across your entire organization.
